

# Updates to Scott Cuba Price Listings--June 2014

by Ernesto Cuesta

All prices for unused stamps are with original gum. All prices for used stamps are with postal cancellations, not pen obliterations. All prices of stamps on cover are for stamps well tied to a private or commercial cover by a postal cancellation, not for stamps on official government correspondence.

Notes on pricing of the Puerto Príncipe surcharged stamps and covers.

1) Pricing of stamps was done using a value of \$3000 for items for which there is only one recorded items in the archive of these stamps that I maintain in my FILACUBA Website at the following address:

<http://www.philat.com/FIL/Pto-Principe/PP-Archive.html>

2) The statistical inventory of these stamps located in the introductory section of the archive was then used to base the prices of stamps according to their reported frequency of occurrence. Stamps with only 2 recorded examples were thus priced at \$1500, those with three examples at \$1000, 4 examples \$750, and so on dividing the base amount of \$3000 by the frequency of occurrence of the stamps in the archive. This was only done for printings 2, 3, and 5 and most of the rarer items of printings 1 and 4, basically those labeled with appended lower case letters, such as strips, inverted and double surcharges and usual cancellations (see Note 3 below).

The rest of items in printings 1 and 4 were estimated based on archive records and current Scott catalog values. I have included the current Scott catalog prices for printings 2, 3, and 5 highlighted in yellow in the table for comparison purposes in case further adjustments in the pricing (other than frequency of occurrence) is desired.

3) One word of caution or necessary clarification: the records in my FILACUBA archive for the 2nd, 3rd, and 5th printings are extremely accurate, but that is not the case for the more common 1st and 4th printings for which I have only recorded stamps with certificates of authenticity and unusual varieties such as strips, inverted and double surcharges, and unusual cancellations. I have not attempted to record all sales of these stamps in the auction catalogs as I have done for the 2nd, 3rd, and 5th printings.

2) Strip and cover prices highlighted in green are based on recent auction realizations. See the inventory of Puerto Príncipe covers in the introduction to the archive for details on each cover. Prices highlighted in orange are estimates based on comparison with those obtained by similar covers in recent auctions, frequency of occurrence of the covers with others of the same printings, and general condition of the covers.
