Madrid, Spain: Federación Española de Sociedades Filatélicas (Spanish Federation of Philatelic Societies), Colección Cuadernos de Filatelia No.7 (Collection of Philatelic Notebooks, No. 7), 1996, 256 pp.+ list of errata, profusely illustrated, in Spanish.

This is an outstanding work comprising the stamp and postal stationery issues of Cuba during the Spanish Administration. It includes regular postage stamp issues and **postal forgeries**, official stamps, telegraph stamps, revolutionary war stamps, and postal stationery. Postal forgeries are discussed on pp.333-34, 59-70, 94-96, 104-108, 117, 125, 127, 131-132, 136-137, 144, 149, 192-193, 200, 207, 222-223.

"Counterfeits of Puerto Príncipe Surcharges"

AJP, Vol.12, No.5, 1 May 1899, p.218.

Report of a "liberal supply" of counterfeits of the Puerto Príncipe surcharged stamps in the market. Advises collectors that the differences between the genuine and the counterfeit is "more in the character of the impression than in the surcharge itself and accurate knowledge of the genuine varieties is required in order to distinguish the real from the false". Also mentions that the counterfeits occur with both genuine and forged cancellations.

Bibliography of Cuban Forgeries **by Ernesto Cuesta**

In spite of the title, most of the work is dedicated to the postal forgeries of the Antilles stamps used both in Cuba and Puerto Rico, and to the stamps issued for use only in Cuba. No postal forgeries of the stamps issued for use only in Puerto Rico are included and only one postal forgery of a Philippines telegraph stamp is discussed. Large photos of both authentic and forged stamps are shown for most forgeries discussed and occasional usages on cover are included where they exist and were available. Details of the identifying characteristics of each forgery are provided both in Spanish and English. This is a well executed and indispensable handbook on postal forgeries.

The Forged Stamps of All Countries

London: J. Dorn, One Volume Stamp Library, n.d., 240 pp.

Forgeries of 1855-75 Cuban stamps covered under Spain. Other Cuban forged stamps covered on pages 203-204 and referenced with respect to Philippines' forgeries on p.205. In the Cuba section, the book only discusses Cuban forged stamps of 1878, 1882, 1883, 1884, and 1898. No illustrations are provided. The treatment is superficial and of little value.

London, England: Stanley Gibbons, Ltd.; 3rd ed., 2 vols., 1906, ill.

Vol.1, dated Jan 1906, contains countries from A to L, xxviii + 587 pp.; Cuba covered in pages 308-321 (14).

Vol.2, viii + 709 pp., contains countries from M to Z. Revision and enlargement of the 2nd. ed.

A rather good and comprehensive, but by no means exhaustive, description of a good number of the existing forgeries of Cuban stamps from the Spanish colonial period. The treatment starts with the Queen Isabella issue of 1855 and ends with the King Alfonso XIII issue of 1898 (but no information on forgeries of the issues between 1877 and 1898 is presented). For those forgeries that are treated in the work, the differences between the genuine stamps and the forgeries are described in great detail.

Detailed study of the Puerto Príncipe issue intended as a guide for the expertization of the five printings of the surcharges that comprise the issue. The article provides a brief historical background of the circumstances that led to the surcharging of the stamps, followed by an overview of the known facts about each printing, and ending with a detailed presentation of the identifying characteristics of each printing and of each surcharge position within each printing. The salient characteristics of the surcharges of each position are clearly described and illustrated. This is an excellent succinct reference for the expertization of this issue. The author cites the work of Barreras, later published by Guerra Aguiar (see <GUER7100>), as a foundation for the study of these issues.

Editor: Carlos Echenagusía García

Madrid, Spain: EDIFIL, S.A.; 2002 Edition, Volume I covering the years 1855 to 1958 only; 16 pages with roman numerals, including title, publication, and introduction pages, several pages of advertisements, three pages of guidance in the use of the catalog and five pages with an overview of Cuban postal history; followed by 256 regularly numbered pages of catalog listings. Topical and genera indexes are included at the back of the catalog. Profusely illustrated in color; priced in Euros; text in Spanish. EDIFIL also hired Carlos Echenagusía García, Cuban philatelic expert and designer of numerous stamp issues of the Castro Government, as a consultant for the production of this catalog.

The catalog builds upon <EDIFIL9700>, expanding the coverage of all sections but eliminating coverage of the Castro era issues for separate publication. All sections carry additional information on errors and varieties. In the Spanish Administration period plating information is provided for some of the platable early issues, the 1860 Y ¼ surcharges and the 1883 surcharges, and prices for blocks and stamps on cover have been added. The U.S. Administration period has also been expanded with additional detail and illustration of military station cancels. In the Republican period, pricing for blocks and covers of the early issues is also provided along with pricing for sheet center blocks and FDCs of the later issues. The back sections of the catalog comprising postage due stamps, semi-postal stamps, postal tax stamps, telegraph stamps, postal stationery, and stamps for officially sealing opened mail have been expanded considerably and a new section on Cuban first flights has been added. References to Cuban **forgeries** of the stamps listed are included throughout.

Extensive article on the Puerto Príncipe surcharges. The article is based on information extracted from PO, MK, MF, AJP, CA (<CA89907>) and the extensive stock of the stamps in the possession of Mr. Senf. The article provides background information on the issue, gives details of their various printings, discusses resulting varieties, talks about their reported places of use and known postmarks, **reports** counterfeits of the surcharges and postmarks, discusses doubts as to the authenticity of the surcharged stamps, and provides a reference list of the known printings.

New Jersey: H.R. Harmer, Inc., Sale 2971, 27 April 2007, Cuban lots #157, 160-445, ill.

The Cuban material in this sale was from the Ignacio Prats collection (this entry is also listed as <PRAT0606>). However, with some possible exceptions, the material was not from his main collections but rather from his files of reference and secondary material. Lots #160-176, 201-202, and 208 were withdrawn since they were mistakenly taken from a stockbook of **forgeries**. This fact was noted by Prats and he promptly notified the auctioneer who withdrew the lots.

The Cuban material comprised a large holding of early issues including and a large collection of postal history with stampless covers, town cancels, incoming covers from other countries, foreign destinations, Correo Marítimo markings, British and French postal agencies in Cuba, and US Postal Administration in Cuba. Images of most lots in the sale are available in my library, as well as PDF files of the following large lots: [203](#), [204](#), 207 ([Part 1](#) and [Part 2](#)), and [210](#).

Excellent specialized catalog of the philatelic material of Cuba during the Spanish colonial period. It includes an introduction titled "Pre-Philately" which is really a very high level overview of the evolution of the mail system during the Spanish Administration. The main part of the catalog is Section 1 covering the regular postage stamp issues. This is followed by separate sections on bogus stamps, cinderella stamps, fakes and forgeries, official stamps, stationery, telegraph stamps, Cuban stamps used in other countries, a catalog concordance, and four plates of photos. For stamps the concordance is between the Jones-Roy catalog and Scott, Gibbons, Yvert, and Guerra catalog numbering systems; for postal stationery the concordance is between the Jones-Roy catalog and the Higgins & Gage catalog.

Excerpting from <PLAS8407>: Detailed, fully illustrated description of the stamps, stationery, and fakes and forgeries of the U.S. Administration of Cuba. The handbook includes a detailed listing and identification of all the Puerto Príncipe issues with all the data provided to determine the genuineness of any of these frequently forged and faked stamps. The U.S. overprinted issues include the correct dates of issue, plate varieties, and plate numbers used. The stamps issued for Cuba are completely described, including the first booklet issued for use in Cuba. Postal stationery listings include all knives and papers, known quantities, plus a listing of the Specimen envelopes prepared for the Cuban issues. An illustrated guide to stationery knives is also provided.

Excellent specialized unpriced catalog of the stamps of the Republic of Cuba into the first few issues of the Castro government. Postage, airmail, special delivery, postage due, and postal tax stamps are listed in the main body in chronological order. Special sections on cinderellas (pp.255-259), fakes and forgeries (pp.261-265), post office seals (pp.267-270), postal stationery (pp.271-291), "souvenirs" issued by the Government (pp.293-294), and telegraph stamps (pp.295-297) follow the main body of the catalog. Since the catalog uses its own numbering system, several catalog number concordance tables are provided at the back of the catalog. For stamps the concordance is between the Jones-Roy catalog and Scott, Gibbons, Yvert, and Guerra catalog numbering systems; for postal stationery the concordance is between the Jones-Roy catalog and Higgins & Gage and Guerra; for post office seals and telegraph stamps the concordance is between the Jones-Roy catalog and Yvert and Guerra. “World’s earliest overprints include successful Cuban postal forgery”

LINN, 7 Feb 1983, p.?, ill.

Article debating which is the world’s second earliest overprint on a stamp, claiming the first overprint was created in 1846 on a local carrier stamp from New York City. After considering a couple of candidates, one from Haiti and another from Mauritius, the article gives the honor of being “philately’s second earliest overprint” to Cuba’s “Y 1/4” overprint on the 2 reales stamp of the first issue of Cuba issued for use in the local delivery service within the city of Havana which commenced in November 19, 1855. The article fails to mention that the Cuban overprint is the world’s first overprint officially issued by a country’s postal administration. The article also incorrectly states that these overprints were applied to the 2 reales stamps of the second and fourth issue, when in actuality they were applied to the 2 reales stamps of the first and third issue. Then the article goes on to the subject of its title, giving a report of the Matanzas “postmaster’s forgery” which the postmaster at Matanzas created by buying 2 reales stamps overprinted “Y 1/4” in Havana, paying 1/4 of a real for each, erasing the overprints as best possible, and then disguising the forgeries by applying a heavy oval grid cancellation on top of the erasures at the time of sale of the stamps to the public. The article implies that these Matanzas “postmaster’s forgeries” occurred on the “Y 1/4” overprints of the first issue, when in fact these forgeries are only known to exist on “Y 1/4” overprints of the third issue. Finally, note that the Y 1/4 “overprints” discussed in this article are technically considered to be “surcharges” because they changed the face value of the stamp.

Discussion of the watermarked paper used in these issues of Spain and the Spanish Antilles to make them harder to forge. The article provides historical information of the placement in circulation of these stamps in Cuba and Puerto Rico based on Guerra Aguiar's of his Estudio Sobre la Primera Emisión Postal de Antillas Españolas

Bibliography of Cuban Forgeries by Ernesto Cuesta

(<[GUER7600](#)>), but indicates that afterwards and until his death Guerra Aguiar affirmed that the 1856 watermarked paper stamps were never used in Cuba, but were only used in Puerto Rico, and then goes on to report the finding of a 1 rpf 1856 postal forgery that the author claims is the first postal forgery used in Puerto Rico. The article illustrates both the front and back of the stamp and indicates that the crossed lines of the real watermarked paper have been crudely imitated by drawing lines in ink on the back of the stamp. The stamp is cancelled by the normal "parrilla" cancel of the time. However, I have in my collection several Cuban covers with ½ rpf stamps of the watermarked crossed line issue, so that Guerra Aguiar's assertion that these stamps were not used in Cuba is erroneous, and so is the conclusion of this article, based on the Guerra Aguiar assertion, that the stamp discussed in this article is unquestionably from Puerto Rico.

Catalog of the "V Exposición Filatélica Hispano-Cubana", Vigo, Spain, 17-25 April 1998, pp.42-48 (7), Span.
This article consists of three sections: the first one provides a historical overview of the first issues of Queen Isabella II stamps used in Cuba and their watermarked and unwatermarked papers, based on Guerra Aguiar's Estudio Sobre la Primera Emisión Postal de Antillas Españolas (<[GUER7600](#)>). The second section is an overview of Cuban history of the 19th Century that has nothing to do with the subject of the article and whose only philatelic interest is the illustration of a cover from Camp Cuba Libre in Jacksonville, Florida, with an interesting cachet showing Uncle Sam persecuting a Spaniard. The third is the main subject of the article in which the author quotes p.103 of <[GUER7600](#)> referring to an official notification dated 9 February 1858 from the Government alerting the public of a postal forgery of the ½ rpf stamp currently in circulation (Scott 12). The author goes on to indicate that this announcement piqued his curiosity and that through his research he has come to the conclusion that the stamp in question is none other than the Type 16 forgery described on p.115 of Guerra Aguiar's book. The author goes on to explain how he came to this conclusion. In the first part of the article, the author repeats the erroneous fact first mentioned in <[NAVA97mm](#)> that Guerra Aguiar has stated that the 1856 watermarked paper stamps were never used in Cuba, and that they were only used in Puerto Rico

This article is a follow-up on <[NAVAP97mm](#)>. The first part of the article provides an overview of the first issues of the Antilles with the effigy of Queen Isabella II, discusses its background, lists the postal rates in effect, and illustrates one of the five covers known with a date of 25 April 1855, the second day of use of these stamps (none are known from the first day of circulation of these stamps). The second part of the article discusses the forgery of the crossed lines watermark stamp that he had assumed was the first postal forgery of Puerto Rico, but now indicates that after further consultations he has been apprised of the fact that the parrilla cancel on it was used only in Cuba, and that the stamps with crossed lines watermark did in fact circulate in Cuba towards the latter part of 1856, thus making it entirely possible that the stamp in question may have been postally used in Cuba. The last part of the article discusses the type II postal forgery of the 1 rpf 1857 issue pointing out the differences with the

Bibliography of Cuban Forgeries

genuine stamp and illustrating an example on a cover from Matanzas to Rivadeo, Spain. The article ends with a summary of the numerous postal forgeries known of the ½ and 1 rpf values of the 1857 issue and the continuing forging of Cuban issues up to 1898, ascribing a U.S. origin to most of them—a fact that is not supported and has no foundation in the existing philatelic literature.

"Forgeries. Cuba.—1870 Issue"

PJGB, Vol.9, No.107, 10 Nov 1899, p.199.

Report of having seen forgeries of all four values of this issue that seem to have been made from the same die, only changing the denomination of each stamp. A general description of the salient characteristics of these forgeries is provided, noting that the colors and perforations are very accurate, making them hard to spot.

Spain and Latin America Stamps and Postal History

New Jersey: H.R. Harmer, Inc., Sale 2971, 27 April 2007, Cuban lots #157, 160-445, ill.

The Cuban material in this sale was from the Ignacio Prats collection (this entry is also listed as <[HARM0704](#)>).

However, with some possible exceptions, the material was not from his main collections which were sold in June 2006 by Greg Manning Auctions (see <[PRAT0606](#)> above), but rather from his files of reference and secondary material. Lots #160-176, 201-202, and 208 were withdrawn since they were mistakenly taken from a stockbook of forgeries. This fact was noted by Prats and he promptly notified the auctioneer who withdrew the lots.

The Cuban material comprised a large holding of early issues including and a large collection of postal history with stampless covers, town cancels, incoming covers from other countries, foreign destinations, Correo Marítimo markings, British and French postal agencies in Cuba, and US Postal Administration in Cuba. Images of most lots in the sale are available in my library, as well as PDF files of the following large lots: [203](#), [204](#), 207 ([Part 1](#) and [Part 2](#)), and [210](#).

The Peter A. Robertson Collection of Cuba--Insurrection and Puerto Príncipe Issues

New York: Christie's-Robson Lowe, Auction Sale, Tuesday, March 15, 1988, 58 pp., profusely illustrated.

Catalog of the auction sale of the greatest collection of insurrection and Puerto Príncipe issues ever assembled. The collection is remarkable for its completeness and for the incomparable number of covers of these issues that Mr. Robertson was able to acquire. The catalog contains an extremely detailed description of the material and is beautifully illustrated, and thus constitutes an excellent handbook for the collector/student of these issues. Note, however, that the Puerto Príncipe issues are organized according to Scott's U.S. Specialized catalog listings of the five printings of these issues which do not correspond to those listed by Guerra Aguiar in <GUER7100>. Also note that the cancellations on some of the Puerto Príncipe stamps in the collection may not be genuine--for example, lots 2143, 2188, and 2199 were stamps of the 5th printing of January 11, 1899, but have December cancellations. The bulk of the collection was bought by Dr. Yamil Kouri (the father). Ignacio Prats was the second largest purchaser. The remainder went to isolated bidders.

This installment of the series that started with <ROIGM0603> and continued with <ROIGM0605> is the only one that addresses reprints of Cuba. "Reprints" as used in this article are basically forgeries or fakes. The article discusses forgeries of the 1855 Y ¼ surcharges (no mention is made of the Y ¼ 1860 surcharge), the 1866 ¼ real "66" surcharge, the 1868-69 Habilitados por la Nación overprints, the 1883 surcharges in which mention is only made of one "reprint" and two "errors" on Scott 120 type "e" surcharge (one in which a 10 is in place of the normal 20 at the center of the surcharge, and another with a double surcharge), the 1898 Alfonso XIII issues in which reprints of the 3, 6, 10, 15, and 20c. and 1 and 2 p. stamps are reported, the 1898-99 "Timbre movel" (should be "Timbre Móvil") 4 and 5c. that the author claims to have on cover, and finally, reprints of the 1898-99 "Puerto Príncipe" issue. These, the author claims, are "the only known varieties of reprints of Cuba, others are not reprint stamps, but re-issue".

This installment in the series that started with <ROIGM0603> and continued with <ROIGM0604> only discusses the stamps of "Porto Rico" and is of interest for some parallels with Cuban reprints. We suppose the "Fernando P.O." is a reference to Fernando Poo, but since the article only discusses Puerto Rican reprints, it is undetermined. Also included in this issue of PWCN is a half page ad titled "Bargains" in which the author is offering various Cuban stmps, covers, post cards, and envelopes, including some "Puerto Principe" surcharged stamps.

("The International Sky Train 50 Years Later")
BNJ, No.15, Apr 1985, pp.3-19 (17), ill., Span. with Eng. summary on p.31.

Extensive article on the pair of stamps issued to commemorate and partially finance the world's first international sky train flight from Miami to Havana on 14 May 1935 (Scott C16-C17). The article starts with a report of the auctioning of a complete sheet of Scott C17 by the Philatelic Club of the Republic of Cuba in 1960 during the National Philatelic Exhibition "CUBEX '60". The sheet was sold at \$400 to stamp dealer Ricardo del Campo who subsequently divided it into blocks, pairs, and singles for sale to his clients. At the time it was surmised that only half a dozen sheets of Scott C17 still existed. The article then provides a detailed historical account of the flight with details of its conception, preparations, financing, execution, ensuing festivities, and flight back to Miami on May 19. This is followed by details of the stamps themselves and the various commemorative flight covers that were prepared and flown on the sky train. Finally, the article provides an extensive discussion of the discovery of a sheet of Scott C16 with a double surcharge by a lucky collector and recounts the polemic that ascertaining its authenticity caused, including contradicting opinions by two experts and its declaration to be a **forgery** by the Cuban postal authorities based on the opinion of one of the experts. But that was not the end of the matter: the stamps were printed in plates of 200 and divided into two sheets of 100 stamps each, and sometime later another collector came forth with the sister sheet of the double surcharge. Samples from this second sheet were submitted to the postal authorities to further pursue the question of the authenticity of the double surcharge, but apparently the matter was dropped because no official ruling as to their authenticity was ever made. Today the double surcharges on stamps from both sheets are held to be genuine, but anyone offered one should submit it for certification because philatelic forgeries are also known to exist.

Co-author: Fernando Cabello Borrás (also listed as <CABE0800>).

Barcelona, Spain: Published by the authors, 2008, 160 pp., profusely illustrated, Span. & Eng. Translation of the Spanish text into English by José Ramón Mallón Bauzá

This is a comprehensive study of the "Derecho Judicial" (Judicial Law) revenue stamps of Cuba of the period from 1864 to 1870. The book sets these stamps in their historical context, provides an overview and analysis of the set of issues, and then goes into a detailed description of each year issue with excellent color illustrations of the stamps, their technical printing information, examples of usages, and record and description of any known **counterfeits**. The text is in Spanish with translations in English up to page 122. The annexes starting on p.123 are only provided in Spanish in unnumbered pages. The first annex is by Fernando Cabello and is titled "Alegoría de la Justicia. Un diseño con avatares. Evolución y cambios en el diseño del cliché de la ALEGORIA DE LA JUSTICIA 1865-1881." This translates into "Allegory of Justice. An evolving design. Evolution and changes in the design of the cliché of the Allegory of Justice 1865-1881." This piece traces the changes in the cliché design throughout its period of use with detailed illustrations of the changes. It is followed by a detailed description, classification, and illustration of the known postal forgeries of the period and ends with a similar exposé of the known **philatelic forgeries**. This annex spans pages 125 to 142. The second annex is found on pages 143-146 and is titled "Falsificaciones de sellos fiscales de Derecho Judicial para Antillas Españolas usados en Cuba" ("Forgeries of the Judicial Law revenue stamps of the Antilles used in Cuba") and focuses on **postal forgeries** of the 1867 and 1868 issues. No author is listed for this annex, but we suspect it is Mr. Sarrías. The last annex is a single page annex on p. 147 consisting of a table with two sections; the first one describing the Spanish monetary system and the second one describing the Cuban one. The annexes are followed by a one page bibliography and a one page index that is in reality a table of contents.

"A Cuban Study"
WPG, Vol.41, No.19, WNo.1262, 12 Jan 1946, pp.490-491, ill.

Good study of the surcharged Giro revenues of 1883. The article notes the existence of only four types of surcharges applied to the regular 1882 bistre Giro stamps, similar to the surcharges applied to the regular postage stamps but with the value in the center replaced by a core of facing semicircles. One interesting item in the article is the mention of the existence of a pane of the stamps in the possession of the author from which he deduces that the setting for the surcharges was done in groups of 50 consisting of 5 rows of ten stamps. The author illustrates the setting of the 50 surcharges in the article. It is not clear, however, whether the pane in his possession is a pane of 50 or 100 stamps--if it is a pane of 100 it would have been key to state that the setting repeated in the bottom half of the pane. The article mentions that the surcharges are apparently symmetrical in the four cardinal directions but with minor variations which can be identified upon careful examination. This assertion is incorrect because the symmetry only exists in two directions, the surcharges being rectangular, not square. The article goes on to note varieties in the printing of the four denominations of the surcharges consisting of missing or broken letters or numerals. Another interesting observation is that it appears that the surcharges were printed separately from the word GIRO above them and the values of the surcharges below them. The article ends by mentioning the existence of forgeries of these surcharges and classifies them into two types, providing identifying characteristics for each, and commenting that they are quite rare.
