"Dr. Tomás A. Terry, Vocal Propietario del Club"
("Dr. Tomás A. Terry, Standing Voting Member of the Club")
AF, Yr.VIII, No.24, May-Jun 1943, p.20, Span.

A brief biography of Dr. Terry, considered by all Cuban philatelists as the father of the Cuban Postal Rocket Experiment, the first officially sanctioned postal rocket in the world. Dr. Terry was a very active member of the Philatelic Club of the Republic of Cuba during most if not all of its existence. See also <[ROSE8408a](#)> and <[ROSE8408b](#)> for additional biographical notes and his obituary. I don't know exactly what "Vocal Propietario" meant, but I surmise that it meant he was a standing voting member of the Cuban Philatelic Club.

Brief article on the Cuban Postal Rocket Experiment a short time after its 5th anniversary. The article provides a brief historical overview of the experiment and the official postage stamp and other philatelic memorabilia issued to commemorate the event. The article also summarizes the various other rocket experiments that preceded the one in Cuba that were conducted as early as 1928 in Europe and the United States. The reference to "Robots" in the title of the article is to the German V-1 and V-2 rockets that the Nazis launched against London towards the end of World War I, since these rockets were also called "robot planes".

Rocket Mail Catalog and Historical Survey of First Experiments in Rocketry by Stephen H. Smith.

Second Revised Edition, 1955. Posthumous edition authorized by Mrs. S. H. Smith.

Corrections and Additions by Dr. Max Kronstein and J. Dellenbag.

Jamaica, NY: Billig's Specialized Catalogues, Vol.8, 1956, Cuba on p.21. Also listed as <SMITS5500>.

Listing and detailed description of the three Cuban experimental rocket mail trials of October 1, 3, and 8, 1939, and of the fourth official flight of 15 October 1939. Numbers of covers flown are given when known and prices are listed for the 15 October covers, cards, and official stamp issued by the Cuban Government to commemorate the event. The listing notes that this was the first "Official Rocket Postage Stamp of the world".

Two supplements to the listings in this catalog were prepared by Max Kronstein and published as "Supplements" to Billig's Specialized Catalogs. The First Supplement was Volume 8A of Billig's Specialized Catalogs (see <KRON5803>). The Second Supplement was Volume 8B (see <KRON6504>).

(Catalog of the Issue and Cancellations Commemorating the Cuban Postal Rocket)

Madrid, Spain: 2004. Published by the author, 17 pp., ill. in color, Span.

The catalog is divided in three sections: the first section covers the trial launches, the second section covers officially issued stamps and FDCs commemorating the actual launch of 15 October 1939, the third section includes covers and labels issued in subsequent years to commemorate anniversaries of the 15 October 1939 launch. The catalog is profusely illustrated in color. Items are priced in Euros both unused and used as applicable. The catalog is all in Spanish. Errata: Catalog numbering is incorrect starting with the 1963 issue which should have been TE25. All subsequent numbers should be adjusted accordingly. This error was subsequently corrected in <ECHE0410> which is basically a reprint of this item.

Mr. García was an exiled Cuban who formed high caliber collections of multiple areas of Cuban philately of the colonial, U.S. Administration, and Republic before Castro. Included in the collection were outstanding holdings of pre-philatelic covers, colonial stamps and covers, colonial stamped paper, U.S. Military Stations markings, U.S. Administration stamps and covers, Republic stamps and covers, postal stationery of the three periods mentioned, first flight covers, and various other specialized collections such as "correo insurrecto" (Cuban independence insurrection mail), colonial Spanish military mail from Cuba, mail to and from colonial British and French post offices in Cuba, telegraph stamps, tuberculosis labels, postal tax stamps, etc. All of these were included in the Harmer-Schau sale, although we have reason to believe that key items from the collections had been removed and sold separately.

The exhibit consisted of 128 unnumbered pages (8 frames of 16 pages each). The 8 frames that were exhibited were awarded a silver medal at the exhibition.

Quoting from the introductory page of the exhibit: "The collection uses mostly flown covers to portray developments during 1914-1935, when pioneers, international airlines, and Cuba's national airline attempted and then inaugurated air mail service to most of Cuba. It also focuses on two special projects, supported by the Cuban post office in 1935 and 1939, to fly mail by gliders and postal rockets." The exhibit consisted of six frames covering the National air mail service within Cuba, one frame covering the International air mail service to and from Cuba, and one frame on the glider and **rocket service** special projects. A copy of a preliminary version of this exhibit also exists where where the last two sections referenced in the previous sentence had not been fully

stamps identified as Guerra catalog #548-549. The second overprint mentioned commemorated the withdrawal of the Russian missiles during the October 1963 missile crisis. The third overprints mentioned are some 1956 unofficial overprints from an expedition by some university students trying to reclaim Cayo Sal for Cuba. Finally, the letters refer to an **overprint on Guerra catalog stamp #776 commemorating the 30th anniversary of the Cuban postal rocket experiment of 1939**. [Note that the letters refer to these overprints as “sobrecargas” or surcharges since the term is frequently indistinctively applied to both overprints and surcharges in Spanish.]

El Correo Aéreo en Cuba--Contribución a la Historia de la Aeronáutica y el Correo Aéreo en Cuba

(The Airmail Service in Cuba--Contribution to the History of Aeronautics and the Airmail Service in Cuba)

La Habana, Cuba: Ministerio de Comunicaciones (Department of Communications), Museo Postal Cubano (Cuban Postal Museum), Feb 1971, 292 pp., sparsely illustrated, in Spanish.

The most complete history available of the development of aeronautics and the airmail service in Cuba by the foremost student and researcher of the subject. The book starts with a general history of the development of world aeronautics and the history of Cuban interest and participation in these developments, initially consisting of balloon flights and later the initial steps of aviation with experimental or test flights and later the establishment of regular national and international air routes, many prompted by the interest of postal authorities to make use of airplanes for the transportation mail. The sections on Cuban aerophilately start with the use of pigeon mail during the wars of independence, continue with accounts of Cuban experimental flights, and finish with the history of the establishment and expansion of national and international airmail.

The sections of the book with aerophilatelic content are the following:

Un correo aéreo en la manigua libertadora (An air mail service in the countryside during the independence wars)

Tres precursores de la aviación cubana (Three pioneers of Cuban aviation)

Primeros vuelos y correos aéreos nacionales (First flights and national air posts)

Primer correo aéreo Cienfuegos—Habana (First air mail service: Cienfuegos—Habana)

Brief mention of the first official postal recognition of rocket mail on October 15, 1939, when the Cuban postal administration issued **the world's first rocket mail stamp**. Reference is made to three trial flights that took place on October 1, 3, and 8, and a picture of an Oct. 8 cover is shown. The article states that some covers were flown and others are simply commemorative covers, but provides no clues on how to differentiate them, and does not indicate whether the cover shown was flown. Additionally, the caption on the picture of the cover shown reads "Cuba was the first nation to issue a postage stamp for rocket mail"; however, the stamp on the illustrated cover is not the officially issued stamp but a privately printed label used on the trial flight covers--the official stamp was not issued until October 15. See <KRON5510> and <KRON5803> for more details on the illustrated cover.
