SCM, Vol.5, No.4, WNo.52, Jul 1928, pp.34-35 (conclusion).

Description by the flight commander of the "Pan-American Good Will Flight" of five amphibian airplanes that left San Antonio, Texas, 21 Dec 1926, and was the first flight to encircle the countries of Latin America in the interest of good will. The flight's itinerary is provided. The flight made stops at Santiago de Cuba on 18 Apr 1927 and Havana on 19 Apr 1927 and ended in Washington, D.C. on 2 May 1927, after covering 22,065 miles. Only three of the five planes that started the flight finished it; two were lost when they collided over Buenos Aires, Argentina, with the loss of the planes and the two man crew of one of them (the crew of the other plane parachuted to safety).

AP, Vol.108, No.3, WNo.1118, March 1994, pp.240-244 (5), ill.

Detalles de la evolución de la Estación Militar No.1 desde su concepción y planeamiento una vez declarada la guerra a España, hasta el final de la Intervención Americana y la instauración de La República en 1902. La estación funcionó en diversas locaciones, de forma ambulante, en un vagón militar en Siboney hasta en barcos de la marina. Se comenta sobre las afectaciones en el funcionamiento de la estación, debido a la epidemia de Fiebre Amarilla. El 21 de julio de 1898, pocos días después que Santiago de Cuba se rindió, la estación tuvo su emplazamiento definitivo en la oficina española de correos de esa ciudad. Se ilustran en cubiertas las marcas postales y matasellos utilizados por la estación a lo largo de ese período.

El artículo señala el buen inicio de muchas actividades organizadas en Cuba por la administración americana una vez concluida la guerra contra España. Sin embargo, se indica un escándalo que involucró a las máximas autoridades postales designadas por el gobierno interventor, el director general de correos E. G. Rathbone y el jefe del departamento de finanzas Charles Neeley. Ambos funcionarios lucraron con la venta de los sellos americanos sobrecargados para su uso en Cuba (Scott 221/226), que debían haber sido destruidos, una vez que arribaron y se pusieron a la venta la serie (Scott 227/231). En el artículo se detalla todo el proceso de investigación que terminó con el arresto y condena de ambos funcionarios. "The Story Behind the Stamp: No.54. Martí and the Cuban Revolution of 1895"

MK, Vol.61, No.19, WNo.2757, 8 Nov 1943, p.293, ill. The #54 in the heading of this article is a mistake, since the previous article was also number 54. Also note that the number sequence in the following cited articles is not sequential since some of the articles dealing with topics in Cuban history were illustrated with U.S. stamps and are thus not cited in this bibliography.

Story of the landing of José Martí, Máximo Gómez, and four others in a rowboat in Oriente Province in April 1895, coming from exile in Santo Domingo to start their fight for independence. The article is illustrated with Cuban stamp Scott 317 depicting Martí, but is misidentified in the heading of the article as Scott 265.

Cuba: First Flight Covers

North Bergen, New Jersey: Published and distributed by the author, 8 Sep 1987, 18 pp.

This is really two lists: one listing the FFCs alphabetically by origin and destination (9 pp. numbered 1-9), and a second listing of FFCs by date of flight (9 pp. numbered 1-9). Both lists also include the AAMC and García catalog numbers, the number of covers flown when known, and an estimated value for the item at the time of publication. The list also indicates whether the FFC has a cachet. Another column indicates whether the flight was a national flight ("N"), or an international flight to Cuba ("T") or from Cuba ("F"). See <[DIOS9505](#)> for an update.

Cuba: Postmark "Duplex"

North Bergen, New Jersey: Published and distributed by the author, 30 Apr 1995, cover plus 6 pp., ill.

List of Cuban "Duplex" postmarks. Two generic types of duplex postmarks are illustrated and form the basis for identifying various varieties of these postmarks in the list. Included are columns for the lettering at the top and bottom of the circular datestamp (cds) portion of the postmark, variations in the arrangement of the date in the cds, diameter of the cds, number of bars in the killer portion of the postmark, and earliest and latest known date of use. The list is arranged alphabetically by the top text appearing in the cds.

Cuba: Official Announcement

North Bergen, New Jersey: Published and distributed by the author, 30 Apr 1995, 2 pp., ill.

List of official post office announcements of stamp issues published by the Cuban Ministry of Communications. The list is ordered by the Scott catalog number of the stamp issue and includes additional columns for a brief description identifying the issue, the language in which the announcement was printed (Spanish, English, or French), and current market price for mint and cancelled copies of the announcements. The first column in the list is an internal code that the author used to tie the item to his general price lists (<[DIOS8203](#)>).

The first cover illustrated on p.1243 bears five stamps of the 1935 set of Columbus stamps that were not issued (Edifil NE-1 to NE-9) as seems to be a registered cover mailed from Santiago to Portugal. If genuinely used, the cover was posted during the Castro era, as deduced from the use of a ZIP Code and the format of the cancellation. The other cover on p.1245 is a #10 envelope from Cuba with an embossed 2c carmine head of Columbus and a Scott 228 stamp postmarked in Havana on 17 February 1906 from the Cuban representative of a U.S. insurance company to a client in Havana who was not found. The cover is marked "No reclamada" (unclaimed and returned to the sender).

"A Stop of the Courier. The Value of Postal History. VII. Rarity"

RF, Vol.52, No.563, Oct 2018, pp.667-668, ill., Span.

The article discusses two types of rarity: real and probable. Real rarity occurs when we know the number of items in existence. Probable rarity is when we know that an item is rare because it is seldom seen, but we do not know exactly how rare the item really is, as is the case with most postal history pieces, where for example, the number of covers with a certain origin, or destination, franking or routing is unknown. The article proceeds to discuss the

rarity of five postal history items, four of which either originated from or were addressed to Cuba, and refines the types of rarity further using the examples cited.

"Department of Inquiry: 119. Why are there so many unused stamps of Porto Rica, Cuba, and the Philippine Islands in the market?"

PW, Vol.24, No.1, Aug 1903, question 119, page unnumbered.

Brief note wondering why there are so many unused stamps of these areas in the market and speculating that it is due to their low face value, the capture of holdings of them during the Spanish-American war, and possible sales of remainders after the war. The author solicits additional information his readers may have on the subject. We note several errors in the article: 1) Porto Rico is misspelled in the title; 2) the statement "1 milesnia being equal to 1 tenth of a U.S. mill." also has a misspelling: "milesnia" should be "milésima" and the term refers to one thousands of a peso, so we don't know what the author means when he says that it is "equal to a tenth of a U.S. mill."

"Department of Inquiry: 682. Is there a 3 cents purple of Cuba 1905-7, and what are its marks?"

PW, Vol.49, No.2, Sep 1910, question 682, page unnumbered.

In answer to the question "Is there a 3 cents purple of Cuba 1905-7, and what are its marks?", the article quotes from A.C. Roessler's Stamp News where Mr. Roessler says there is a 3c re-engraved, which would be Scott 235, but which is left out in Scott's catalog (it still is). Distinguishing marks are not provided, but reference is made to a forthcoming book on U.S. colonial stamps by a Mr. Melville which will provide the missing information. The stamp referenced by Mr. Roessler does not exist, nor are there any essays or proofs known. Also worth noting is question 681, preceding the above, "How many different kinds of U.S. Stamped envelopes are now current?" that mentions 58 kinds, not counting varieties, classified into 14 sizes, 4 values, and 5 papers, and proceeds to describe them. This is useful information for the Cuban postal stationery specialist since during the U.S. Administration of Cuba, U.S. stamped envelopes were overprinted for use in Cuba.
