Cuba. Incluyendo la Colección del Dr. Ibáñez.

(Cuba. Including the Collection of Dr. Ibáñez.)

Barcelona, Spain: Soler & Llach subastas internacionales, s.a. Catalog of the international auction of the Dr. Miguel L. Ibáñez collection of Cuba, held December 15, 1995, containing 487 lots, profusely illustrated, in Spanish, bidding in U.S. dollars. [Prices realized](#) handwritten on the margin during the auction.

Outstanding auction dedicated in its entirety to first class Cuban material from the Dr. Miguel L. Ibáñez collection covering the pre-philatelic period, British and French postal agency mail, maritime shipping company mail, Cuban forwarders, and the philately of the Spanish colonial period, the U.S. Administration, and the Republic. The strength of the auction was in the 19th century material, especially the stamps and covers of the Spanish colonial period. The U.S. Administration period was only four lots plus a collection of postal stationery of both the U.S. Administration and the Republic which did not sell. The material of the republic included an outstanding selection of booklets and booklet panes, a complete set of the Cuban inverts, and a few other proofs and essays, but did not have great breadth. Included also were an outstanding collection of telegraph stamps with proofs and essays and a similarly outstanding collection of revenues (the first one sold, the latter didn't). Even though the auction was advertised as containing the entirety of Dr. Ibáñez's collection, significant parts of it were missing as determined from talking to various persons that knew the contents of his collection and could not find key items from it in the catalog. An example of this could be observed in lot 210, an accumulation of material from the 1855-60 first three issues of Isabel II from which all the 2r. stamps with loop watermark were missing and all but one strip of 10 with the sheet header of the 2r. stamps without watermark were also missing-- items which certainly were not missing from a collection of the caliber of Dr. Ibáñez's collection. I attended the auction, studied the material offered for several days before the auction, and bought a considerable amount of the stamps and covers of the Spanish Administration and of the booklets and booklet panes of the Republic.

Copies of the contents of the following lots are available in my personal library:

Lot 178	Lot 182	Lot 205	Lot 212
Lot 241	Lot 246	Lot 247	Lot 248
Lot 249	Lot 251	Lot 252	Lot 254
Lot 257	Lot 259	Lot 266	Lot 271
Lot 273	Lot 281	Lot 290	Lot 291

Lot 337	Lot 342	Lot 351	Lot 394
Lot 422	Lot 424	Lot 426	Republic Lots

On 19 February 2007, the Soler & Llach auction house resold additional pages from the Ibáñez collection, in particular lots 3210 through 3218, and 3251. Other individual items in that sale could have also been from the Ibáñez collection (see <[S&LL0702](#)>). Lot 205 was resold at Sandafayre on-line auction 5175 of 20 July 2010 (see <[SAND1007](#)>). Lot 422, a superb collection of Cuban telegraph stamps went unsold at this auction. It was later sold at the 332nd Heinrich Koehler Auction of 13-14 March 2008 as lot 1503 and sold for 6,600 Euros or US \$10,350 at the time (see <[KOHL0803](#)>, lot 1503). The collection was bought by Spanish philatelist Eugenio de Quesada who remounted it, expanded it with actual telegrams of the 19th century, turned it into a gold

<[ICPS](#)> International Cuban Philatelic Society (ICPS)

Website of the International Cuban Philatelic Society (ICPS)

The original website of the ICPS was created by Ernesto Cuesta following the pattern of the Cuban Philatelic Society of America (CPSA) Website that he had created and maintained for the CPSA from 1998 until the end of September 2009. The website was inaugurated at 11:37 p.m. on March 8, 2010, via an e-mail sent to CPSA members and other philatelists specializing in Cuban philately, inviting them to join the ICPS. By July 2010, Robert Littrell had taken over the maintenance of the ICPS website as webmaster and remains so up to the present. During his tenure as ICPS Webmaster, Mr. Littrell has done a superb job of maintaining and expanding the website. One of his most significant contributions is the section of the website called "Members' Pages" where numerous collections of importance from ICPS members are continually posted and enhance. Mr. Littrell also publishes the ICPS Auctions as part of the website, and while they are ongoing, keeps the bidding by participants up-to-date in almost real-time, especially during their ending phase.

<[ICPS-Auctions](#)> International Cuban Philatelic Society (ICPS)

Periodically conducted auctions of primarily Cuban philatelic material submitted for sale by ICPS members or any other philatelists. ICPS members are not charged a sales commission on items sold. Non-members are charged a 10% commission on sales. ICPS members are charged a 10% commission on items purchased. Non-members are charged a 15% commission on purchases. Auction regulations are posted in the ICPS Website at the following address: <http://www.cubafil.org/auct-rul.html>. Frequency of the auctions is completely dependent on the availability of sufficient material being submitted for sale to the auction manager to warrant preparing and conducting an auction. Past auctions are posted in the ICPS website at the following address:

"Cuba 1960: The Christmas Issue Error of the 2 Centavos Value"

CP, Vol.VII, No.1, July 1977, pp.23-24, ill., Span. & Eng.

Report of the existence of 16 sheets of the 1960 Christmas stamps of 2 cents (Scott 653-657) imperforate horizontally. The author explains that these sheets were perforated in groups of 16 and using the knowledge of the sheet numbers of four of these sheets he has seen, presents some mathematical calculations to confirm that they all belonged to a group of 16 that should have been fed into the perforating machine together, but apparently missed being perforated in the horizontal position. A photo of one of the subject sheets is shown.

Republic of Cuba Collection of Specimens, Booklets, Proofs, Varieties, Errors, and Waterlow Die Proofs

Unpublished spiral bound photocopies distributed at an East Coast philatelic exhibition in the early 1990s by an auction house that had the collection for sale by consignment from Mr. Iglesias. The collection covered the period of the Republic from 1902 to 1960 and was divided into the following sections, each preceded by a summary page detailing the contents of the section and its estimated value:

"Muestra" & "Specimen" Stamps (17 Pages) estimated at \$5,800.

"Booklets" (9 Pages) estimated at \$7,300.

"Proofs/Pruebas" (24 Pages) estimated at \$21,400.

"Varieties/Variedades" (13 Pages) estimated at \$2,660.

"Errors" (20 Pages) estimated at 41,550.

"Waterlow Die Proofs & Plate Proofs Study" (44 Pages) estimated at \$28,900. Combined estimate of \$107,610.

Co-author: Silvia García-Frutos (also listed as <GARCF1005>)

CPa, Vol.21, No.59, May-Aug 2010, pp.16-18 (3), ill., Eng & Span.

Report of the discovery by Mr. Richard Pounder of a new plate variety of the first Cuban Special Delivery stamp, Scott E1 in his collection of U.S. Possessions. The article describes and illustrates the identifying characteristics of the stamps having the variety “Dots in Frame” (Cuba Scott E1aSa) from U.S. Plate No.882 of U.S. Scott E5 that apparently was overprinted for use in Cuba—a fact that had so far been unreported and leads the authors to believe that very few sheets of this plate were thus overprinted. The authors mention in the article that in the 2009 auction of the Pounder collection each was able to obtain a copy of Cuba Scott E1aSa. I have not been able to identify the auction house that offered the Pounder collection, but have been able to identify two 2009 Siegel sales that each included a copy of Cuba Scott E1aSa. The first one was offered as Lot 910 of Siegel Sale 969 of the Whitpain Collection of U.S. Possessions held 12 February 2009 and sold for \$4500. The second one was offered as lot 799 of Siegel Sale 974 of the Laila Collection of Hawaii and U.S. Possessions held 16 June 2009 where it sold for \$425 (see <CUES-Auctions> listing for Jan-Jun 2009).

“Mensaje del Editor – Editor’s Message”

CPa, Vol.21, No.60, Sep-Dec 2010, p.3, Eng & Span.

Summary of CPSA accomplishments and “challenges” faced by the CPSA during 2010: 1) The CPSA celebrated its elections of its Officers and Board of Directors for the next three years. 2) The CPSA had to defend its integrity against a complaint brought before the APS of which the CPSA was “vindicated. This was not quite so: the complaint presented before the APS requested that the CPSA change its bylaws to permit any member to serve as President and Vice-President of the society and the CPSA had to follow suit and change its bylaws accordingly before it was reinstated as an affiliate society of the APS and since the 2010 elections had already been held, the change of the bylaws only applied to future elections. 3) A new Cuban philatelic society (namely the ICPS) was created to “confront and directly compete unfairly against the CPSA. Again an incorrect and malicious statement. Ernesto Cuesta was expelled from the CPSA after years of support to the society because he complained about the prohibition in the CPSA bylaws to elect Presidents and Vice-Presidents that were not residents of the Miami metropolitan area. There was no intention for the ICPS to confront or compete unfairly with the CPSA and there were no negative reasons for the creation of the ICPS as falsely stated by Mr. Iglesias in his message. 4) Report of the CPSA participation in StampShow 2010 held in Richmond, VA, where more than 20 CPSA attended and some entered exhibits. See <CODI1009> for a detailed report and photos of the CPSA participation at the show.

"Genuine Stamps with Fake English Post Office Cancellers"

"Sellos Genuinos con Matasellos Postales Ingleses Falsos"

CPa, No.86, May-Aug 2019, pp.24-25, ill., Span. & Eng.

The word "Cancellers" in the English title of the article should have been "Cancels" or "Cancellations".

The article is a cursory overview of colonial Cuban stamps with cancellations from the British consulate post offices in Havana and Santiago de Cuba. The first paragraph on page 25 states "The stamps shown below framed in red are genuine stamps, but there is no valid reason for their existence, since their use was not permitted within the British PO." This statement is confusing since the stamps framed in red are those with fake cancellations and the statement in the second part of the sentence is not explained. Moreover, the article ends with the statement that the fake cancellations "are on the wrong stamps" without further explanation. Finally, we note that the fake cancellations are all shown framed within a red rectangle at the end of the article, and comparable stamps with genuine cancellations are shown framed within a green rectangle below the red rectangle with no attempt to make a comparison of similar fake and genuine cancellations side by side explaining their differences other than to say somewhere in the text that the fake cancellations are rough and over-inked. An article from an expert on the subject that leaves much to be desired.

"Entero Postal de Cuba de Cuba Usado en Las Filipinas"

CPa, No.90, Sep-Dec 2020, p.20, ill., Span. & Eng.

Report of two U.S. 2c. stamped envelopes surcharged for use in Cuba (Scott U3) that were used in the Philippines by superimposing a manuscript word "Philippines" over the surcharged word "CUBA". Both covers were sent by Major S. T. Armstrong from the Philippines to his wife in New Rochelle, New York, almost two years after the end of the Spanish-American War. Images of both covers are shown.

"Cuba E1 Special Delivery Stamp: With and Without the Period"

"Cuba E1 Entrega Especial: con Punto y Sin Punto"

Co-Author: Silvia García-Frutos (also listed as <GARCF2101a>).

CPa, No.91, Jan-Apr 2021, pp.76-79 (4), ill., Eng. & Span.

Article about the error of the missing period after the word "PESO" in the surcharge of Cuba Scott E1 that occurred in the first printing consisting of 10,000 stamps. The sheets of 100 stamps were cut in half vertically for surcharging and a surcharge plate of 25 surcharges was then used to surcharge each quarter of the full sheet of 100, but this was done after separating the left and right halves of the full sheet of 100. This is known because the surcharge with the missing period was located in position 22 of the quarter sheet and a left margin arrow block of 4 stamps is shown with the stamp with the missing period appearing in the top right corner of the block corresponding to position 22 of the left half of the full sheet of stamps. On the other hand, no sheet center block of these stamps is known to exist since the full sheets of 100 stamps were separated vertically for surcharging. The article also provides information on how to identify the position of the missing period in the bottom half of the half sheets of 50 stamps and how to differentiate the ones of the left half of the sheet from those on the right half, provided that the selvedge of the two half sheets is preserved around the bottom line of stamps.

“Gibara—Silla de Gibara. First Cuban Land Seen by Columbus?”

DISC, Vol.13, No.1, WNo.49, 12 Jan 1995, pp.885-887 (3), ill., Span.

Article describing the 19 May 1940 issue by the Cuban postal administration of a set of stamps commemorating the 450th anniversary of Columbus' discovery of America (Scott 387-391, C36-C37). The article focuses on a statement on the 5c. airmail stamp (Scott C36) indicating that Gibara was the first spot of land in the island of Cuba spotted by Columbus on his first voyage and after doing some research the author discovers that the historical records contradict that assertion. Silla de Gibara is the name given to a mountain seen from the town of Gibara that has a flat top—thus the name “Silla de Gibara” or “Gibara’s Chair”.

“Re: Gibara, First Land Visited by Columbus in America?”
DISC, Vol.17, No.3, WNo.67, 12 Jul 1999, pp.1203-1204, ill.

This is a follow-up on <[IGLEM9501](#)> prompted by the article “The Landfall Controversy in Philately” by B. Bielefeldt, published in Discovery, Vol.17, No.2, p.1180. The article establishes that the statement on Cuba’s Scott C36, “Silla de Gibara, Primera tierra cubana vista por Colón” (“Saddle of Gibara, the first Cuban land seen by Columbus”) is correct, but clarifies that the bay of Gibara was not the place where he first touched land. That place has been determined to be the bay of Bariay to the southwest of the bay of Gibara. [The “Silla de Gibara” is the tallest mountain in the vicinity of the bay of Gibara and is more aptly translated into Gibara’s Chair since the salient characteristic of this mountain is its flat top, more akin to a chair than a saddle].

"Christopher Columbus lands in La Evangelista"

Published by the Christopher Columbus Philatelic Society (CCPS) in booklet form and send as a separata together with most likely the January 2014 issue of the CCPS journal *Discovery*. The item referenced here is an advance copy by the author consisting of 15 pages profusely illustrated and dated "2013" at the end.

A note from the President of CCPS dated 25 July 2022 indicates that due to its length, the article was most probably printed in booklet form and sent along with an issue of *Discovery* in 2014, most probably in January.

The article focuses on Columbus landing at the island "La Evangelista" (later the "Isle of Pines" and lately "The Island of Youth"), during his second trip to the Caribbean. After providing background information about the trip and the landing at the island, and its geographical location and historical background, the article then describes and illustrates various philatelic items relating to the island.

Ex. The Samuel Israel Collection of CUBA & PORTO RICO

Photocopy of the portion of the Samuel Israel Collection of Cuba and Puerto Rico which Mr. Israel donated to the Philatelic Foundation of New York (probably in the mid 1930's) and which the Foundation exhibited in the Court of Honor of the International Philatelic Exhibition "Centenario" held in La Habana from 12 to 19 November 1955 and later sold through Harmers of New York at an auction held 17 Jan 1980; 242 pp. Photocopies of parts of the collection are available at the library of the Philatelic Foundation and in my library. See <HARM8001> for additional details of the auction. See <SIEGR8210> for details of a subsequent auction by Robert A.Siegel for the Philatelic Foundation of major rarities from the collection which were withheld from the Harmers auction. Photocopies of the material sold at the Siegel auction may be available at the library of the Philatelic Foundation.

The Samuel Israel Collection was an extraordinary accumulation of material of the highest quality starting from a few stampless covers, through the Spanish and U.S. administrations, and into the early 1930's during the Republic. The strength of the collection, however, was in the Spanish Administration period. The collection included used and unused singles, pairs, strips, and blocks; full sheets; varieties; errors; stampless and stamped covers; postal stationery; etc. In blocks, it contained an almost complete run of unused blocks of 4 of all stamps of the periods covered. Following are sections of the collection:

Comments on the occasion of the 125th anniversary of the first railroad inaugurated in Spain from Barcelona to Mataró pointing to the fact that a railroad had already been inaugurated 11 years before in the Spanish colony of Cuba from the city of Habana to the town of Güines (misspelled Güimes in the article) for the transport of sugar cane. The article points several details of the Cuban railroad, including the fact that mail was transported and that a section in one of the passenger cars was dedicated to the mail service. The article derives its title from the fact that it indicates that in 1937 Cuba issued a surcharged stamp (Yvert 254, Scott 355) commemorating the Centenary of Cuban railroads.
